

Holiday Fire Safety Tips

Deep Frying with Oil

When deep frying a product it is important to follow these rules.

- 1: Make sure that you are cooking outside in the open. Not in the garage or under a covered patio. Every year numerous structure fire occur due to the fact the home owner was deep frying near the residence or covered area.
- 2: Make sure that you follow cooking instructions for the correct temperature for the item being deep fried. Over heating the cooking oil can cause it to ignite.
- 3: If oil fire occurs DO NOT USE WATER!!! Contact 911 immediately
- 4: Measure the correct amount of oil to be used. You can do this by filling the container with water first and the inserting the item to be cooked. Mark the water line with a marker. You need to keep a safe area in the container, keep at least four inches clearance from top of container to prevent boiling over the container.

Holiday Lights

Every year people enjoy decorating with light. Make sure to follow the instructions provided by the manufacture and these simple rules.

- 1: DO NOT alter the electric cords in anyway
- 2: DO NOT overload circuits.
- 3: Use power strips or generators for large projects.

Live Christmas Trees

If you decide to have a live Christmas tree then here are a few things to remember.

- 1: Be careful not to leave Christmas light on for long periods of time.
- 2: Make to check the water level in the container to keep the tree moist.
