

The City of Glenn Heights Traffic Calming Petition

PETITION SUMMARY: Traffic Calming is the use of a physical design and measure to improve safety. The basic principle behind traffic calming is to reduce the speed of motorized vehicles. By reducing the speed of motorized vehicles, the aim is to decrease the likelihood that pedestrians or cyclists will be hit and even if a collision does occur, the impact is reduced, and the injuries are not as severe. Traffic calming increases roadway safety for motorized & non-motorized users of the road.

A petition form must be signed by at least 51% of the property owners in the primary affected area as determined by the City to initiate a review of the request. All residents that sign the petition must live in a 200-foot radius around the proposed traffic calming device (primary affected area).
